Gliding through my wasted life
With ants on endless escalators
Mystery rash and no job
Absent use oh how I hate her
Could it be this stagnancy was laced in all the lies they
fed me
Drown them out with song and friend and drink, ingest
this sideritis
Spit it from your mouth like a foreign object
Sing it to the world like a drunken prophet
Spit it from your mouth like a foreign object
Why do you reject this
Spit it from your mouth like a foreign object
Sing it to the world like a drunken prophet
Spit it from your mouth like a foreign object
Why do you ingest this
You're standing skin for bumps I don't know braille nor
do I need the answers
All that I've been suffering from is urban fucking
cancer
Out into the car I will be eaten by the glowing embers
Search for love, the love I lack
I want my blood, I want it
Spit it from your mouth like a foreign object
Sing it to the world like a drunken prophet
Spit it from your mouth like a foreign object
Why do you ingest this
We will erase all life on earth but us
We will erase all life on earth but us
So you don't front like you've not heard of us
We will erase all life on earth but us
We will erase all life on earth but us
We will destroy
We will erase
