To you my friend, I send my best regards
I hope that all is well and good in Neverland
It's been one month since goodbyes rang out and
echoed long
Across the distance time had carved
It seems there's nothing left to do since you've gone
and left me here in the street
The taste of ocean water is bleak and the cold wind's
blowing at my bleeding feet
Why can't I keep you from my heart?
Why is there nothing I can do
Get over you, over you
Could be regret time I've lost, could be I see
mountaintops
Baby miss you since you've gone
Baby miss you since you've gone

We stared up high out where the stars almost burnt out
a hole in the sky
But now the sky is faded and it's burnt around the
edges
From this lawn all crisp and yellow where I lie
I should have known not to seal up my mouth and leave
it alone
But now I scream across this gap across this endless
space

Cause you blessed me, girl
Then you robbed me of my fragile world
And I miss you, girl, more then anything in the world

Take me as I am
'cause I would do anything if only I could see you
I'm deprived of hope, I'm God's sick joke, cause he
took you away

Cause you blessed me, girl
Then you robbed me of my fragile world
And I miss you, girl, more then anything in the world

I've learned to hate this place
I want to burn it down and run away

Until I see your face I will loathe this house I will hate
this house

'Cause home is where the hurt is
'Cause its far away from you

Home is where the hurt is
'Cause its far away from you

Yeah, home is where the hurt is
'Cause its far away from you

Yeah, home is where the hurt is
'Cause its FAR AWAY FROM YOU!
YEAH!

One, two, three!

Falling out of love is like giving up a drug
I can't move on with my life
You have my heart as fractured as it is
Even if we have to say goodbye
Goodbye...

Goodbye...
Goodbye...
Goodbye
