

Saybia "Save Me"

Visit "[Save Me](#)" on MotoLyrics.com

I'm a kleptomaniac, and I am proud to say that I'm also
a hypochondriac
As well so tell me what to do, ooh
I'm scared of going outside coz I could catch a cold, I'll
catch another's cold
I'm desperate to be arrested coz I'm so unsure of what
I might do

Save me, before I break the law again
God save me before I make another sin

Now I'm getting treated for my mental illnesses
And every night I lock the door to my little lover self
But I forgot to tell I'm also claustrophobic

Save me, save me before my head explodes
Save me, save me so I can break my mental code

Now I'm starting to get well,
But still i'm scared coz every time I see her child I get
erections

So please, save me, save me before my head explodes
Now save me, so I can break my mental code
Now save me, save me before I break the law
Oh save me so I can break my mental code (my mental
code)
Save me from myself
Save me
God save me from myself
Oh won't you save me?
