Events within the quantum?
Can be manipulated to some extent
Producing effects observable in the classical world

She's the one you read about
In the army, over twelve years
Oh Johnny, what's that? You've been here before?
We'll take her home in tears

She's the one who swears a lot
Her over-indulgence is the key word
Well she needs a good hard slap in the face
Don't leave her unperterbed

(She's the one from Germany)
She's the one from Germany
(And we don't need your kind)
I know he's not home
(Around here)

And we don't need your kind, around here
(She's the one from Germany)
I'm the not the only one
(Cause she's the one)
She's the one from Germany
(Cause she's the one)
She's the one from Germany
(She's the one)/she's the one
Around here
(Cause she's the one)
I'm not the only one
(Cause she's the one)
(Around here, I'm not the only one)
She's the one from Germany
(She's the one)/she's the one
She's the one from Germany
(She's the one)/she's the one
Around here, I'm not the only one
