I've been kind of nervous about this get together
I've been kind of nervous about the weather
Oh what to do - you want to take a walk? - yeah - alright
Take a walk in the pouring rain
Take a stroll down Kelly Lane
It's so bright, it's so bright from up here
You're so tender and crystal clear
You take walks so very nice
And you continue to pass the dice, the dice
Oh tonight you lit the spark
I could hold you 'til dawn or taste you 'til dark
My lips are numb where the hell did you come from
Take a stroll to stay sane
Kelly Lane

Press the pedal in your yellow jeep
Whoever said dreaming was cheap
I've gotta tell you it's been hard to walk
You do something to me
And you just don't stop
Come here I can face you
Come here I can taste you
Come here I can erase you
Holding love on our finger tips
I could taste the rain falling on your lips
My tongue is numb, where the hell did you come from
Take a stroll to stay sane

You're the real one, a real woman
I need a problem to function
Kelly Lane
