

Scar Symmetry "Holographic Universe"

Visit "[Holographic Universe](#)" on MotoLyrics.com

Bathe in laser light, the beam will underline
The birth of universe from nothingness
Prime awakening, the second beam comes in
To bounce and interfere as drawn by will

We're finding that we can never die
A subject no more to loss than gain
The more you try to connect with form
The less you're yearning to see all you could behold

Then the third beam comes to bring it all alive
And bring to form the once chaotic swirl
See creation sing the word infinity
Behold this organized constructive skill

We're finding that we can never die
A subject no more to loss than gain
The more you try to connect with form
The less you're yearning to see all you could behold

While all we did was to divide
Breaking down the whole
We never looked at what we found:
Hologram within
Why we relied on space and time
No one here can know
At last we looked at what we found

Holographic worlds are in sight
To consciousness we moved from where we used to
find a god
We have made this concept our own
Now we believe that this reality came from a dream

Forever tried to tell us: "Time is on our side"
You recite this knowing and you find it all

Night leads to day as mind finds a way
You were asleep now you leave the role of one
forsaken play

This time we found a way to view the world inside

Now we've come to know it and leave the past behind

While all we did was to divide
Breaking down the whole
We never looked at what we found

Rise from decay in worlds gone astray
Truth lies beneath, hiding deep within a once forsaken
way

While all we did was to divide
Breaking down the whole
We never looked at what we found:
Hologram within
Why we relied on space and time
No one here can know
At last we looked at what we found

Here unfolds the truth of all that is alive
And here we wash away what was proclaimed
Hail awakening, forever lead us in the urge to be alive
We know you will
