#### VERSE

I thought he was my partner  
Less than lovers, more than friends  
He said it wouldn't last  
But like the cosmos, it never ends

They say he's going steady  
With some woman that I don't know  
I've never met this person  
But I think that I should go and say hello

I wish that he'd step back  
And weigh his options for what they're worth  
She may be smart and pretty  
Oh, but our love has orbited the earth

#### PRECHORUS

I will not let her take my place  
I'm in a new kind of space race

#### CHORUS

But I don't tell my parents  
And I don't tell my friends  
I just grab some rubber tubing  
And I pull on my Depends  
And then I drive  
It's time for a road trip

I've printed out these letters  
That he sent her, and all of that  
I've written these directions  
To her house, so we might have a little chat

I'll take this airsoft pistol  
Should she makes threats against my life  
A wig and pepper spray  
And this eight inch Gerber folding knife

#### PRECHORUS

I will not let my man pursue her  
Now she will get what's coming to her

## CHORUS

## BRIDGE

She's just a captain in the Air Force  
She's never been in outer space  
I guess I'll have to go remind her  
That I'm a g\*\*damn astronaut  
And she should know her place

I pass through the state border  
And I'm welcomed by a sign  
I can feel my heart pounding  
In my temples - and justice will be mine

She's nowhere in the airport  
Then I recognize her car  
I see no reason why I should be fearful  
I've already come this far

## PRECHORUS

I will not let her victimize me  
At this point nothing can surprise me

## CHORUS
