"Weight"

Visit "[Weight](#)" on MotoLyrics.com

You look as if you need a second hand
Ain't that so?
You say, you say we'll make it here some day
I know you
The beat that's been working has stopped

Take this weight off my shoulder and lead me to you
Take this weight, you get colder, what more can I do?

Your face, you gotta care it like a stone
Ain't that true?
Stay safe, I lock the door, unplug the phone
I know you
The beat that's been working has stopped

Take this weight off my shoulder and lead me to you
Take this weight, you get colder, what more can I do?

Take this weight off my shoulder and lead me to you
Take this weight, you get colder, what more can I do?
