"Microworlds"

Visit "[Microworlds](#)" on MotoLyrics.com

From microworld to microworld
Never knew which way the wind was blowing
From pretty girl to pretty girl
None of them had any way of knowing

There were others in my life
But a vacuum at the centre
I was reaching for the love I couldn't know

When I met you and you redefined my feelings
I met you and I was suddenly alive
Like the fabulous exploding of asteroids in darkness
We collide

From microworld to microworld
How was I to know where I was going
From emptiness to emptiness
Somewhere in my spirit I was dying

There were many hidden valleys
But a vacuum at the centre
I was reaching for a light I couldn't know

When I met you and the galaxy went spinning
I met you and I was pulled into the light
With the rarefied experience to guide me to the light
We collide

There were many shooting stars
Many comets burning brightly
I was searching for the fire that wouldn't fade

When I met you and the galaxy went spinning
I met you and I was pulled into the light
With the matter that is constant in it's density inside
Me
We collide

I met you and the galaxy went spinning
I met you and I was pulled into the light
Like the fabulous exploding of asteroids in darkness

We collide

I met you and I was pulled into the light
