You're something else she says.
Don't fade into the background
And oh, I'll never be the same.

It's too late for sorry and i'm sorry,
But i'm just having a hard time
Believing a word that you say.
Is it really that hard
To say what you're thinking?
Is it really that hard
To say what's on your mind?

Call off the party,
Call off the show,
Call off the roses,
She doesn't need to know what I've got planned.

And he said, you're the last one,
And he said, you're our only hope,
And your eyes rely on the tides,
And they're ever-changing, they're ever-changing,
And he said, you're our only hope.

And I can't wait till everyone sees us.
We'll make them all so proud to say,
They knew us then,
And I can't wait till everyone sees us.
We'll make them all so proud,
You'll make them all so proud.
