Push all the buttons down, take off the brakes
Burn out the circuit board, force this mistake

Crawl into the ground, buried by sound, bionic waves
are all around

Pick one of these three doors, lock it away
Trade all your feelings for fears, saving the day

Cracked under the sun, barely unknown, I lost my voice
in Mexico
Fighting it slow, acceleration lost it's pull, it's void and
null
Fall short again until the end

Crawl into the ground, buried by sound, bionic waves
are all around
Won't hold me down, acceleration lost it's pull, it's void
and null
Fall short again until the end
