The one I love is lost without the least bit of explanation  
Just goes to show the futility of self-preservation  
Now all I seem to see is all this war, and goin' amongst  
our nations  
What good will it do

Now everybody wants to know the secrets to our  
salvation  
Forever reading on and on, from Genesis to Revelation  
Never stopping for a second to examine situations  
After all that we've been through

And love it only ends  
When there's nothing left to defend  
Will we ever see, yeah, yeah  
The common bond of humanity

Go on...

Get a landscape of famine and also of frustration  
And children walking round without the proper means  
to education  
And still up there on Capitol Hill they're passing all this  
legislation  
For jails and bombs

Still we live behind these hollow walls of lies and  
segregation  
People walking round without the proper means to  
medication  
And still up there on Capitol Hill they're passing all this  
legislation  
For jails and bombs

Anybody out there can hear my prayer
