### "Future"

I went to get my palm read  
She couldn't find the line  
She said, "you got no future baby, come back another  
Time"  
I called you from the cell phone  
Just to hear you sigh  
I tried to warn you girl, it was all a lie

I've seen the future baby  
There ain't no future baby  
I am the future baby, it's here

Bombs dropped in the name of love again  
Bombs dropped in the name of god again  
There is no love, there is no god  
When your bombs are maiming men
