I see my future there in your eyes  
Together and forever, it's you and me  
You see cause I wont be listening to what my friends  
have got to say  
I know they'll be there all the way

You promised  
And I know  
That you will always care  
(I know that you'll always care)  
Through good times  
Through bad times  
You're always there

Hold me now don't ever let me go  
I'm in love with you but you already know  
I want this love to last and be forever  
If you believe and you can only see  
That making love to me would make your life complete  
Hold me tight and say you leave me never  
Straight from the heart you changed my life forever  
more

I dream of waking up in your arms  
And watch the sun bring in the day  
You see what I can't imagine I'm sure we can achieve  
Which means never giving up on this dream

You comfort  
And you guide me  
When skies are grey  
(You guide me when skies are grey)  
And I feel you  
And I need you  
To say you'll stay

Hold me now don't ever let me go  
I'm in love with you but you already know  
I want this love to last and be forever  
If you believe and you can only see  
That making love to me would make your life complete

Hold me tight and say you leave me never  
Straight from the heart you changed my life forever  
more

Forever more  
Forever more  
Changed my life

You promised  
And I know  
That you will always care  
(I know that you'll always care)  
Through good times  
Through bad times  
You're always there

Hold me now don't ever let me go  
I'm in love with you but you already know  
I want this love to last and be forever  
If you believe and you can
