"Meteor"

Hearts all around my feet
Don't you ever sweep the street
If they still can keep a beat
Hands holding other hands
I'm a girl and you're a man
Do you know what's moving me?

One night, a meteor came to my door and he asked me
to dance
One night, a shooting star he traveled far just to ask
me to dance

Arms give away your need
Tie them up and around me
And play me as you please
Dance nothing left to spare
Fill it up with all your air
you're the one I want to see

One night, a meteor came to my door and he asked me
to dance
One night, a shooting star he traveled far just to ask
me to dance

Ooh lalala (repeated)

One night, a meteor came to my door and he asked me
to dance
One night, a shooting star he traveled far just to ask
me to dance
