I show no scars from where I've been
Just two jaded eyes, I guess you win
This cage you locked to hold me in
Its bars of trust wore paper thin

Now that it's ON I don't know where to begin
Follow me down (Follow me down)
Now that you're ON you don't know how to defend
You are your own end
What did you expect?
To get all you compromised back?

Call to Arms if nothin's gonna change in me
It's not that easy when you're guilty but you have to be
Just let it alone

Don't make me find the simple things that we used to
be
Don't try to turn this rotten apple into a seed

And now that it's ON I don't know where to begin
Follow me down (Follow me down)
Now that you're on you don't know how to defend
You are your own end
What did you expect?
To get all you compromised back?

Call to Arms if nothin's gonna change in me
It's not that easy when you're guilty but you have to be
Just let it alone

Let it alone
Just let it alone

Call to Arms if nothin's gonna change in me
(Call to Arms if nothin's gonna change in me)
It's not that easy when you're guilty but you have to be
(Call to Arms if nothing's gonna change in)
Just let it alone
