(I want you back)
(I need you reflect)
(I know I'm sold)

There's something inside of me that won't let you go
Don't let them finally take control
There's something inside of me that I don't care to
show
Let the cold die for me

I need to fly
When we all breathe to die
My questions always end in why
I need you to fly

Let your drones fly, fly

There's something inside of me that won't let you go
Don't let them finally take control
There's something inside of me that I don't care to
show
Let the cold die for me

New time for disease
One last time, please
And you'll always be in me

I need to breathe
I can't even believe
That all you came to do is leave
I need you to be

Let your drones fly, fly

There's something inside of me that won't let you go
Don't let them finally take control
There's something inside of me that I don't care to
show
Let the cold die for me
