We walk these streets alone at night
Repeat these feet with idle mind
We walk these streets we don't know why
Beneath these dreams we're all a lie
Above the scene we never cry
Beneath these dreams we hide our lives

With me, just know you're not alone tonight
With me, you're as empty as it all
And you'll see that nothing here is wasted
With me, as empty as can be

We dance the way they showed us how
We talk the talk, it's louder now
We shake it off, they told us how
Slowly make your way over to me
That's all you've got to lose

With me, just know you're not alone tonight
With me, you're as empty as it all
And you'll see that nothing here is wasted
With me, as empty as can be

You and me are nothing but dead leaves mid fall
The fall of our lives
Don't care what they say, we'll kill life our own way,
Don't care what they say

With me, just know you're not alone tonight
With me, you're as empty as it all
And you'll see that nothing here is wasted
With me, as empty as can be
