I think I should decide to listen  
Though we both know it's a bit too late.  
I think I should take a new position.  
We both know there's no time to waste.

So many moments - gone like lightning.  
Why should we spend even one fighting?

I think I should change my way of thinking.

Right or wrong is not the issue.  
I think I should move in a new direction.  
Back to you is where I belong.

So many moments - gone like lightning.  
Why should we spend even one fighting?
