Rumble in the jungle  
Ahh

Back on the mike, I got the sound  
Holding you down, down to the ground  
Speakin' the melody  
Who out there got the skills to test me?

I've been here for far too long  
It's time to break out, it's time to be strong  
Beats going crazy inside my head  
Do you feel alright?  
Here comes the night

All my friends are talkin' to me  
What's this love I see?  
I know you can make it right  
I'm still waitin' now  
Waitin' for the love I need  
If you want me to  
There's somethin' don't understand  
I don't know

(Yeah)  
All my friends are talkin' to me  
What's this love I see?  
I know you can make it right  
I'm still waitin' now  
Waitin' for the love I need  
If you want me to  
There's somethin' don't understand  
I don't know

Don't be afraid, it's just my work  
Comin' up, bringing the words  
Soon I'll have ya movin' in time  
It ain't my fault, just the lyrics that rhyme

As I chop, change, rearrange  
Choose and refuse, cause of fame  
Gonna getcha hot like a burning flame  
Everything's alright

Here comes the night

All my friends are talkin' to me  
What's this love I see?  
I know you can make it right  
I'm still waitin' now  
Waitin' for the love I need  
If you want me to  
There's somethin' don't understand  
I don't know

(Yeah)  
All my friends are talkin' to me  
What's this love I see?  
I know you can make it right  
I'm still waitin' now  
Waitin' for the love I need  
If you want me to  
There's somethin' don't understand  
I don't know

Waitin' for the love I need  
If you want me to  
There's something don't understand  
I don't know
