

Scott Matthews "Upside Down"

Visit "[Upside Down](#)" on MotoLyrics.com

I walk a tight rope
And live with a high hope
That somehow we still feel the same

Through this catastrophe
It's quietly telling me
Welcome first that word again

I don't care if the world's upside down
If you're lost or you're found
I know my feet will stay far from the ground
If you just stick around

I know the shots you call gentle
'Cause I could fall and break
You'll hear what they say

I read between the lines
Cuts like a hate crime
And tell me today's not the day

I don't care if the world's upside down
If you're lost or you're found
I know your feet will stay far from the ground
If you just stick around

You hear the high note
That comes like a cyclone
And tell me today's not the day

I, I don't care if the world's upside down
If you're lost or I'm found
I know our feet will stay far from the ground
If you just stick around with me
