"Now Or Never"

Visit "[Now Or Never](#)" on MotoLyrics.com

As we have wandered thousand years
Through centuries of blood and pain
I don't believe that god can feel
Our mere existence

Technology is who we serve
As we kill by remote control
We do not see and do not feel
Disaster is coming

It is time to know that it's now or never
There will never be another chance
What is wrong in doing things together
If you try to take another glance
Now that you've been tryin' so hard to get there

It would be a shame to just let go
Nothing's gonna happen if you just stare
Wouldn't it be hard to never know

Is there no way to intervene
To change belief of those who rule
Or do we really have to face
Our self-extinction

If he has ever been above
Then he must truly be asleep
Or we must pray for our souls
That he is forgiving.
