I fell tonight deep down in the lies you told me  
I kept secrets That maybe weren't even secret  
I crashed down out at your feet the way you wanted me  
too

(Chorus):

While I break down desperately for help, you save my  
shadow  
While I fall in depression, you let my spirit soar  
Let me live hell for all you care

I left cause I was tired of waiting  
To be someone who's good enough for you  
I sit here alone thinking to find another way home

(Chorus):

While I break down desperately for help, you save my  
shadow  
While I fall in depression, you let my spirit soar  
Let me live hell for all you care

You never cared enough

(Chorus): 2x

While I break down desperately for help, you save my  
shadow  
While I fall in depression, you let my spirit soar  
Let me live hell for all you care

For all you care!
