### "The new priesthood"

Visit "[The new priesthood](#)" on MotoLyrics.com

History's shown you that answers can't be found above.  
Life's great questions are tackled only by us.  
Knowledge of mysteries that puzzle your learned men  
of the cloth.  
We've explanations that men of God can't fathom.

Searching for your destiny  
In a book that's not reality.  
We solve the the Earth's problems  
Through our science and technology.

Look back one thousand years when science was in its  
infancy.  
The church had the word, the world was forced to  
heed.  
How many times they led astray, their flock was shown  
no mercy.  
"It's God's will", not good enough, minds were closed  
ignorantly.

We are here to shed the light,  
And your "Savior" is powerless to fight.  
You must realize that your theology is wrong  
And we are right.  
Accept it for it's proven,  
And the truth is for all to see.  
Scientifically we'll answer any question there could be.

Obviously you don't see that we've become your  
deities.  
Can't you see that we are your new priesthood?  
Blinded by your piety and impotent divinity,  
Recognize that we are your new priesthood!

Religious dogma that's confused and shackled you.  
Searching through the good book not knowing what's  
the truth.  
You're only innocent, raised servile and unaware.  
Unconversant to what is really out there.

Humanity must be erudite but not only from books

should it gain insight.  
Through practice of sound philosophy comes  
cognizance of Man's own plight.  
This you won't find in your church or your faith,  
Though science has always attempted to explicate.

Obviously you don't see that we've become your  
deities.  
Can't you see that we are your new priesthood?  
Blinded by your piety and impotent divinity,  
Recognize that we are your new priesthood!

Intelligence is lacking in your realm.  
That is why we've come to take the helm.

As you have seen, you cannot turn to God for the  
solution.  
Mankind has thrust himself into a sick position, lack of  
vision.  
To those who blanket and surround themselves with  
gullibility,  
There will be severity.  
Yet again we will achieve the answers because we are  
more than God.

As you kneel and pray,  
Genuflect our way.  
Try and feel your way  
Without our guidance someday.

History's shown you that answers can't be found above.  
Life's great questions are tackled only by us.  
Knowledge of mysteries that puzzle your learned men  
of the cloth.  
We've explanations that men of God can't fathom.

Searching for your destiny  
In a book that's not reality.  
We have solved the the Earth's problems  
Through our science and technology.  
We see the things that you can't find in your faith.  
We are in command with men like Hawking leading the  
way.

Obviously you don't see that we've become your  
deities.  
Can't you see that we are your new priesthood?  
Blinded by your piety and impotent divinity,  
Recognize that we are your new priesthood
