I came down, was thrown on the ground
Searching for smiles, getting frowns
Watching musical highs like Messiaen and Miles
All I was getting was downs

And give me some color, give me some bone
Give me relief or leave me alone
Give me some boots, give me some brains
Got nothing to lose and all to gain

I've been subject to a certain suspect
Who played like they hate, what they said that they
liked
I won't sublet or pretend to beget
A shackled down music that's nothing but hype

I just want to show you a smile and a wave
Next thing to dark blue is deep purple haze
I just want to show you a vision of the sun
So glad to know you 'cause you're second to none

I just want to show you a smile and a wave
Next thing to dark blue
I just want to show you a vision of the sun
So glad to know you 'cause you're second to none
