Smothered you suffocate  
Choke on me  
Confused you isolate all your intentions  
There's no vaccination

Gardens that burn from fires  
Evacuate the Angels  
Who stand on the funeral pyres  
To escape temptation  
Nothing has been consistent  
Not your life or your vision  
When two hearts burn as one  
Who is the victim

You're my siren  
Entice my heart 'til it is yours

These bars are getting to me  
This gray box so isolating  
I've paced in it every day  
For too long it's been my sentence

(Temptation) you're my siren  
Entice my heart till it is yours

This is yours  
This is my heart
