You're like a diamond, healthy and wealthy
When you're cut through
Like the ocean calm and mild
'Til you let it all loose

I'm learning a lot about you
Learning a lot about yesterday
There's not a lot I can do
If you don't want me too close to you

The first thing I can remember
I was heading for the sun
The next thing I can tell you is

I'm in and out with you
I'm in and out

I'm the liar in your eyes
That wants to burn you
But my desire has never
Been to hurt you

I'm learning a lot about me
I'm learning a lot about all the things I need
There's not a lot I can do
When you don't want me too close to you

The first thing I can tell you
I was walking on the moon
And in a blinding flash it all ended
It was over far too soon

I'm in and out with you
I'm in and out with you, I'm in and out
I'm in and out with you
Said I'm in and out with you

Yes, I am in and out with you
You got me in and out
