I won't say no more about what we're talking 'bout  
I won't say another word  
All my dreams that I try and tell you 'bout  
You don't understand a word

All the time and all the bridges over  
Water through our hearts and minds  
Now I see that all we had was nothing  
When all the time and all the lies so I tell you now

I won't say no more about what we're talking 'bout  
I won't say another word  
All my dreams that I try and tell you 'bout  
You don't understand a word

You and I and others, we have been there  
We've hit the bottom and not the top  
So who would have thought  
That all we had had fallen

When all the dreams I have, I'm goin' up so I tell you  
know  
As you sit there smiling  
Not a thing can make me see that you have changed  
Break away from death's road

We had dreams about that fame and fortune  
Said I'm gonna make it and be a star  
All of our names remembered by the people  
I should have known that we could never go that far
