It all comes down to what was said,  
Mistakes were made the blood we bled,  
Cold eyes were statue,  
So much damage in one look,  
The price we paid for what you took,  
Tears on a tattoo,  
You thought we'd shatter, helplessly but,  
Here's what matters, it won't be the end you'll see.

Chorus: Still we will go on, still we will stay strong,  
Still unbroken, still we're hopin',  
We'll never disappear,  
We'll find our way from here, still.

We have screamed, and we have cried,  
Made it to the other side, now we are laughing  
We can finally catch our breath, moving on with no  
regrets,  
Drive without crashing,  
These precious dreams they never see,  
We spread our wings so far from where we used to be,

Chorus: Still we will go on, still we will stay strong,  
Still unbroken, still we're hopin',  
We'll never disappear,  
We'll find our way from here, still.

Chorus: Still we will go on, still we will stay strong,  
Still unbroken, still we're hopin',  
We'll never disappear,  
We'll find our way from here, still.

La la la la, la la la la, la la la la, la la la la, la la la la

Still we will go on, la la la la, still we will be strong, la la  
la la,  
La la la la, Oh still, la la la la, still, la la la la (fade)
