"The Natural Night"

Visit "[The Natural Night](#)" on MotoLyrics.com

Remember the sky all the planes with their lights
They tried to outshine the natural night
The static was so so bright, we couldn't believe our
Sight.

I was scared for you and I don't know why

Can I sleep in your shadow.
The desert went on and on
(Can I sleep in your shadow. Good Night)
And I have been gone too long
(Can I sleep In your shadow. Good night)
Good night

We battled the wintry Winds.
We put on our thickest skins.
You wouldn't have thought it was the middle of spring
Attempting to reconcile my tongue and my teeth for
awhile
Proved my faculties were too helpless to speak

Can I sleep in your shadow.
The desert went on and on
(Can I sleep in your shadow. Good night)
And I have been gone too long
(Can I sleep in your shadow. Good night)
Good night
