(WeaselPersonality)

Take stock of the situation assess the complications that
arise from our half
truths the stage in this case is just a tool to make it
possible for you to
justify your blighted worldview I've got an answer if we
don't need it we
don't take it the scams transparency is we get older
and we feel like we are
missing something we wonder why our plans don't
work when we take a stand we
slink away like frightened rats I've got the answer if we
don't need it we
don't take it we want to build a perfect world somehow
but the prizes just
out of reach have slowed us down
