"Too Late"

Visit "[Too Late](#)" on MotoLyrics.com

Scribe and ali and yea we still together through the stormiest weather it's been along forever holding it down in the south surrounded by the southern alps with the lyrics hot fun if you know what im talkin bout then throw your hands in the air I freestyle in the square then i'll catch a number five so i can rock at the pier get live im 90.5 the main source show spell it out for cats who don't know bout the F L O and we how move through the rain sleet hail and snow rockin mic with our minds heart body and soul i'll be unsigned hype till i get creative control and i know the haters praying that the scribe wont blow but (its too late) and i made it like that i sacrificed everything just to get where im at and to be honest im not stopping till im counting them grands and everythings on schedule and according to plan

CHORUS But so your out of time if you think your f***ing with mine because (its too late) I know you didn't want to see scribe and ali doing our thing but (its too late) yo, smiling at my face stab me in the back, it's cool because (its too late) because im here now it's our year but for you (its too late)

Yea it's too late scribe and ali since 98 still going, were still flowing like a can of speights still cut up the vinyl plates like a piece of cake still write songs to stimulate your mental state sharpen your state of mind catch up yo you way behind like even your anatomical clock is out of time we on a mission, moving up at a steady pace aiming for first place, so we got no time to waste and you can do it too the scribe is gonna show you how the only trick is that you got to d-d-do it now and stop sitting around like you got nothing to do say you can't do it then it's already too late for you take out a leaf out of rhyme book you know i made it through can't teach a crowd if you can even educate the crew you know i came prepared training for several years i made it here without a second to spare

CHORUS

Said it's too late for haters out there trying to stop me
now you never heard, yo i submerged from the
underground this time im staying up and i aint never
comin down i made it this far and i did it all by myself
so think twice, if you think gonna take me out said you
don't know me and you don't know what my crews
about cause weve been doing this were not losing this
and weve been proving were forever staying true to
this get with the movement as im not hanging round
for long in fact im gone, your too late you better check
my song you know this lyrisist individualist MC puri-
slash communication specialist even when effortless
my skill can still rip a show this scribe is definitet so
don't act like you didn't know i know you know my
rhyme and you flow it line for line but it's too late to
decipher cause you out of time

CHORUS
