I'm sitting here beside the door
Still' I wondered what's for sure
Don't wanna take it as my own
All these worries' I will throw

Pre/Chorus:
Echoing from my mind
All Your words into my heart

Chorus:
Oh Lord it's hard to believe
To understand, oh why I feel
This way' behind, seems like
Collusion that never ends
But I will try, to find
All the answers beyond that noise
Inside my head, inside my head

(End half of the chorus)
I know it's You, I find
All the answers beyond that noise
Inside my head, inside my head

I hear You call me
When I feel so cold
I'm thinking where else could I go
Is this life work it all along
As if were walking through the storm
