[Translated]

Even if I see you accidentally, I won't go to you
I won't ever be by your side ever again
Even if it is hard to take the pain of separation
I'll handle it by myself

Every morning that used to be the same, will change
When I open my eyes you won't be there
Everyday that used to be the same, will be a bit
awkward
Because I won't be able to be with you anymore

*The painful separation that is buried under time
And loving you again will be a bit strange
I think I can keep it without anyone knowing,
The pictures from long ago
And your smile towards me

If I can meet you again I'll greet you as a comfortable
friend
I'll greet you thanking you for remaining in my memory
My walk will probably be heavy, walking away from you
I'll handle it by myself

Every morning that used to be the same, got
comfortable now
I kept it in my heart
Everyday that used to be the same, I got used to it
Because I can be with you

Repeat *

You would say that it would be hard
To return to the past
But please just stay a little longer like this
Just like now, in my heart right here...
I never got ready to let you go
Not even once...
