See the way she's moving out on the floor
She's got you down on your knees begging for more
The way she moves that body it will make you fantasize
So star stuck you've been hypnotized

So put your head to the speakers
We're the doctors giving you what you need
So put your head to the speakers

Put that bible down that's in the bottom draw
It aint gonna do you good, not anymore.
See her boyfriend, he's stood over by the bar
Hit that exit door if you don't wanna spar.

So put your head to the speakers
We're the doctors giving you what you need
So put your head to the speakers

So put your head to the speakers
We're the doctors giving you what you need
So put your head to the speakers

(Rap)
There the boys that's in the club you know, there the
boys that's rocking your microphone, so I'm the doctor
you can be my nurse, Kick it off start it in reverse, she's
the girl that likes to party, hard, fast, won't stop till the
morning now. Get a ticket and come to my show, she
brings it right down to the floor, sing the words that you
know, sing it now, lets go.

So put your head to the speakers
We're the doctors giving you what you need
So put your head to the speakers
