A thousand voices
are telling me I made
the wrong decision
this time, I wont listen
I never felt so alone
all night waiting by the phone
wondering when you will call, if at all

And I miss you
Miss you more than anything
anything in the world
And I need you
need you more
everyday, in everyway
Your right beside me

I've waited so long for you
each night waiting to pull through
oh if only you knew
how I always loved you

And I miss you
Miss you more than anything
anything in the world
And I need you
need you more
everyday, in everyway
Your right beside me

And I miss you
Miss you more than anything
anything in the world
And I need you
need you more
everyday, in everyway
Your right beside me

your right beside me

your right beside me
