Once upon a time
That's where i'll start it
Your eyes met mine
And love is all around us
No appointments and no anxieties
Just one heart beating
You and me.
No desings and no defenses
I need to know I want to know all your faces
Just hanging around
To be together
Just ganging around
We're climbing up Cypres Hill
And there's nothing but blue skies
Your walking with your hand in mine
And I'm right beside you.
Ooh ooh ooh
Yeah yeah yeah
When I meet you again
We'll have everything you need to
Start over again
doesn't matter where we we're before
Just straight ahead now
we're walking out a graet big course
Of our own direction
Ooh ooh ooh
Yeah yeah yeah
When I meet you again
We'll have everything we need to
Start over again.
