Great grey clouds rolled down the road from a tall  
mountain side  
Weather man said grab your coats or take cover inside  
But I stood their waiting with my arms open wide

Way to long since the rain dragging through this  
draught  
Quench or thirst let new things grow let the seedling  
sprout  
Come on clouds do your thing let the rain poor out

And as it starts to fall I feel the drops rolling off  
Cleanse my skin, kiss my face, and I am changed  
I am changed

I watched my troubles flow down the street like a dried  
up gutter leaf  
Through the storm drains it did pass until the sea it was  
released  
And it felt so good to finally be free

And as it starts to fall I feel the drops rolling off  
Cleanse my skin, kiss my face, and I am changed  
I am changed
