Verse 1:

A death's Rhythms everywhere  
Life's voices under the graves  
Turned the human to that animal  
But your smile keeps me strong  
Living for ever  
And dying together  
Living for ever  
But no body

Pre chorus 1

I'm walking alone through unknown directions,  
Following the light's shining from a blinker,  
A darkest mist blinding my vision.  
But something pushed me back away!

Chorus

World is falling down  
But there's nothing in this life x 2

Verse 2

Look around you  
And search for the safety  
Who destroys and breaks the colours  
Living for ever  
And dying together  
Living for ever  
But no body

Pre chorus 2

Some say the life is a piece of heaven  
Some say' it's eternal stays  
I guess they were blind,  
For not having seen the graceful side!

Chorus

World is falling down  
But there's nothing in this life x 8
