It's silly lover
Nothing ever done with hate
Rise above
It's nothing left for you to find
Stop to lead up all direction with left in
Just for saving all of the secrets that shepards can't say
Here comes the day
The lights are just to show
What we believe it's just a dream and never runs..
But the cities never dead
It's young and beautiful
It's young and beautiful
It's hard to always open and the sky it's paint in red
It's young and beautiful
It's young and beautiful
Feel the oceans of emotions of they...
Like the way they find the ...away
Hear the breathing
Please believe in the
Here comes the day
The night was just to show
it's all a dream what we believe
.....
But the cities never dead
It's young and beautiful
It's young and beautiful
It's hard to always open
And the sky it's pain in red
It's young and beautiful
It's young and beautiful
....
You're young and beautiful
You're young and beautiful
But the cities never dead
It's hard to always open
And the sky it's pain in red
It's young and beautiful
It's young and beautiful
