Your smile made me dizzy
When you said the things you said
I will lie here dreaming
Thoughts won't leave my head

How funny life can be
But then again,
it was always you and me

You were always there to talk to
Always there for me
Now I just lie here dreaming
I want you here with me

How funny life can be
But then again,
it was always you and me

You were always there to turn to
Always there for me
Now I just lie here dreaming
I want you here with me
I want you here with me
I want you here with me
With me
With me
