Positive reaction or go to the action technical traction
Enter the new phase forget the wind with the new
dance daze
As you flow as it goes into your brain
While thoughts remain and then sustain
Or make romantic glance a chance never lose
We're Nomad and this is just a groove

I found this sound while beats abound
A crowded town while words profound
Until I hit'em with tight tongue twisters
While brothers and sisters misses and misters
Hear and stare the break that we annoint
To shake the joint down to the point
It's your chance to dance and make it smooth
'Cos we're Nomad and this is just a groove
