"Light Bulbs"

Visit "[Light Bulbs](#)" on MotoLyrics.com

Let me light a lightbulb in this heart
Switch it on whenever it's dark
Let me switch it on and off let it beat a spark
Make it dim and shallow

When I'm feeling low
Turn it around to the brightest light
When I'm feeling good
Let it glow let it glow
And make you mine again

The nature of the moon wont deny
There is something it has witnessed
Something your eyes must have missed
We could have seen the years ahead
The love we shared could have spread

Now weeping wont stop you from creeping -
In and out like a switch turns on and off
All it seems to do is burn when it sees you with others
