Make Love
Wild I am with loose clothes layers come off
I go the extra mile without touching
No visual pictures
Just the scenes work with the intention of making love
No physical contact to electrify his...
Still he whispers gentle words
My ears listen close and blow him an air kiss'
Without poking or eying we make love' the sensible way
As desires die out
And smoke fades the lips turn red and the music evade
Wild wild fire escapes
We have just made love
