"Two Points"

Visit "[Two Points](#)" on MotoLyrics.com

Hey, kind of feeling you
Through crowded spaces in horizon scenarios
And after all you know
You can find me here

Turn it up
Turn it down
Turn it all around

So, so turn it up and go
The nights are bright and cold
And after all I know

So, so turn it up and go
The nights are bright and cold
And after all you know
You can find me here

Can you make so?
Why can't you turn it away?
Can you make so?
We're dashed two points away

Why can't you? To Turn It!
We're dashed two points, two points away
