Sebastien Lefebvre
"Good Night"

Good night
I can show you all the things I found out
Someone told me once to stand up and fight
Forget the past cuz you can't go back tonight

Come as we light up the sky
Look up and tell me you tried
To really really let me go
And I figured out I loved you so

Good night
You should melt the ice and drink the water
There won't be anyone else to flatter
Roll your eyes back we could paint the future tonight

Come as we light up the sky
Look up and tell me you tried
To really really let me go
And I figured out I loved you so

Coose to believe
Roll up your sleeves
Just one more time
We'll be fine
Running around
I think we can slow down

Come as we light up the sky
Look up and tell me you tried
To really really let me go
And I figured out I loved you so
