Eclipse]
Yo yo
Within a certain mile radius
The unknown violence contagious
Can't be contained and trapped like many pigs inside
cages
See the world like I see it is devided like the sea is
The faces of folls(?) and scrolls
Temperature screams and thongs shatters your
perero(?)
Even hoes bigger than the square mile
The prices explodes like missiles hitting the brissel
Breach the cold case when I whistle
The evidence is face to face, in case you fucking with
disservable greats
Race wars unravel, undercover pineapples
Shadow rolling in throttle with the pedal to the metal,
fly away
Like 13 Apollos when I refer to space shuttle
Incoming savages putting in damages on niggas like a
scavenger hunt
Blod, like shedding marriages, thight fit
Like cheese managers, I know the gun talk but speak
silencers
Plus charges and never minuses
To let you know, just spreading knowledge
Loyal like carriages, added to violent style
Is like the postal work travellers striking on services
Gun in they hand, turn murderous
Get the picture, or image on the Kodak frame
** CHORUS overlaps last line, can't make it out **

CHORUS

"I still rock it and rock well" (scratched by DJ A-Trak)

"Rock well, well, well"

[Logik]

Physically and mentally you're dead
Yet you keep facing Obscure
Why do you engage in hardship, you're not willing to

endure
We're making tabs to it, my crews live beyond Newark
Discarded the evidence, now you bitch about the
consequence
Ever since you approached us, toast us
Wonder why you suffer the symptoms of multiple
sclerosis
Son you know this, ???? full of cutlery is useless
I shape things to make Christians to start praying
Moses
Crews oppose this, many of which I reprimand
Any man who strikes a pose is ashamed him with
extreme closeness
Face it my verbal uppercut give y'all facelifts
Free of chage, looking like those Hollywood stars
Coming for us, let me y'all according to my informants
You guys bring arms and don't miss
Verbally you can't disarm this, or harm this
I harvest the marvelest
Now take hits from the bong kid

CHORUS

[Science]
I leave you walk alone like a girl who's flat chested
My intellect never been tested, who the best kid?
The rest be just split like mad erasers
I fuck up they grill like braces, your style is tasteless
Now face it, we hit streets like crime waves
Rhyme pays and then we disrupt the ciphers like drug
raids
We invade conscious thought, then we bounce like hop
scotch
The whole block know the time, call it a neighborhood
watch
Nigga, you can't figure how we flow
Fluent like fluid, but fuck it
You new a triples spot kid, I blew it like BLOOW
My concita say wow, he say frego
My style be thick and chunky girlfrien, just call me
prego
Comprendis, outris, hombris, giving you access like...
fax sound
Process these lyrics, I transmit on my fax like fibre
optics
Last call for y'all niggas with silly topics, what!

CHORUS

[Science]
O.D., word is bond, rock well

A-Trak, what, word is bond, rock well
Dave One, what, word is bond, rock well
Check it out, '98 Last Call to area 514
[Eclipse]
Area's 5-1, the last 4 got dropped to the floor
Settle a score, kill 'em all
No prisoners of war, that's all
Here to NASA, hit a blast y'all
It's the last call
Cop at your door, coming to harass ya
What y'all niggas doing here? (yo, nothing at all)
I suggest y'all blaze off forward (we started from raw)
And if the beast want to beef (better be ready to fall)
'Cause the future is looking grim (and the light is
Obscure)
