Hey baby do you know I love to dream about you
The way you smile with that sparkle in your eyes
And when we talk I don't say all I really want to
My words get eaten up by all these little butterflies

[Chorus]

I haven't felt this kind of feelings in a long time
You got me nervous as a school girl on prom night
Keepin' me wishing you'll be kissing me someday soon
I just want you

Hey baby do you know your hands have left me shakin'
With just one touch you're as your love is in the making
I play it out relive each moment in my mind
I hear your voice sayin' "I want you", boy you're mine

[Chorus]

I haven't felt this kind of feelings in a long time
You got me nervous as a school girl on prom night
Keepin' me wishing you'll be kissing me someday soon
I just want you

Want you to want me
Want you to want me
Baby

[Chorus]

I haven't felt this kind of feelings in a long time
You got me nervous as a school girl on prom night
Keepin' me wishing we'll be kissing someday soon
I just want you

Want you to want me, feel the same kind of crazy
Want you to call me names like beautiful and baby
Want you to want to be kissin' me someday soon
I just want you
I just want you
