Did you get your heartache and your head rush
confused?

Have you been sleeping late 'cause you've been
abused

Are you alone?

Does it feel like those around want you to die
Are you alive?

Did you grab your sleeping bag when you hit the floor?
Have you been feeling bad 'cause you've been a bore?
Oh, you're just lonely

And it feels like those around want you to die
But you're alive

Was it loneliness that kept you
Or baby, did you think it a curse?
Oh, were you grateful for the pleasure
Or baby, do you think this is worse?

And it feel like those around want you to die
Well sometimes you feel like just crying
You're still in love with me and you don't know why
