We all know you're freezing
No covers to hold down
Selling books for money
Your pusher's comin' round
You've got missing fingers
And you've got missing toes
But nothing ever stops you
From bringin' your life down
We all know she's still in love with you
And we all know she still ain't got a clue
And we all know she's still in love with you
Well, we all know she's got other things to do
Than messin' around with you
Wastin' time with you
And all your loser games.
The needle was your saviour
Almighty of your mind
Feedin' lies to your lady
How was she so blind
You ripped off all your neighbours
You're payin' for your crimes
But nothing ever stops you
From ruining all our lives
